

THEY TALK IT OVER

COUNTY SUNDAY SCHOOL CONVENTION IN SESSION.

At their meeting yesterday they measure Theoretical Plans with Actual Experience as Found in the Work of the Sunday School—A Paper on Sunday Observance Classes the Sunday Morning Newspaper as One of the Works of Satan—A Printer Present Wants to Include Monday Morning Papers.

The Sedgewick County Sunday School convention convened yesterday in the Y. M. C. A. auditorium, as had been announced in the Eagle, with President George E. Campbell in the chair and Rev. J. Brunker as secretary.

Devotional exercises were conducted by Professor G. W. Hoss, after which the subject of discussion was announced, "What Are We Here For?" which brought out a general discussion from almost every delegate present, and if one-half of the ideas suggested were fully carried out the convention would find plenty of work to occupy its attention for a full month instead of two days.

Rev. J. Brunker then read a paper on "How to Make Township Work More Effectively," which was replied to by many practical suggestions. P. H. Filina, who had been assigned a paper upon the same subject, was not present and after singing "God be with You Till We Meet Again," the convention adjourned for dinner.

At 1:30 o'clock the convention reconvened and the song services were conducted by State Secretary J. F. Drake, Mr. Shaver being reported sick.

The next subject announced for discussion was "Sunday Observance, and How to Teach It." This was responded to by J. S. Turnbull, who read a lengthy paper upon the subject, not forgetting in his zeal to locate Sunday morning newspapers in the same category as Sunday theaters and beer gardens.

The gentleman's remarks as to Sunday newspapers were too much for an old time printer who was present, who introduced a resolution to condemn the Sunday morning newspapers in place of those issued upon Sunday morning.

He made the startling revelation that the work of the Sunday morning paper required the destruction of the Lord's day, by the editors, reporters, composers, telegraph operators, pressmen, mail boys, business office, the gathering of "bids" and the collection of new transactions which deprived hundreds of the best citizens of the country from having their usual labors.

Keeping the commandment suggested by the gentleman, "Six days thou shalt labor, and on the seventh thou shalt rest from all thy labors." While the actual practical facts of a Sunday morning paper all this work was done on Saturday, and on Sunday the office was closed and these men had a chance to attend divine services, including the Sabbath school with their families. Yet this man who had labored Saturday was compelled to hear the preacher and every little 2nd society that meet issue a batch of resolutions condemning a paper which gave to him the right of enjoying the Sabbath day, and uphold the issue of a paper that would forever bar this class of citizens from the observance. He also made the startling declaration that the reporters, editors, telegraph operators, pressmen and hundreds of other helpers had souls to save.

These remarks brought forth considerable discussion, which brought forth the old worn out stereotyped argument that men could not read the secular news on Sunday morning and attend the church service fully submitted to be led by the spirit of the Lord. In other words, that men who engage in the newspaper business did not possess souls worth saving.

One poor fellow in his ignorance suggested that Monday morning newspapers could and were now printed between 12 o'clock Sunday night, and made ready for the morning mail by 3 o'clock in the morning, but fortunately there was no one in the audience outside of the speaker who would give the subject a second thought.

The discussion as to Sunday morning newspapers grew so warm that Chairman Campbell suggested that the matter be laid over until today when it could come up with the resolutions. The sense of the meeting could be plainly discerned, however, that the person who knew the least about the subject under discussion were against the Sunday morning paper, simply because it was dated on the Lord's day and would gladly accept the paper if the hypocritical idea was adopted dated on Monday.

The subject will be brought up today and undoubtedly thoroughly discussed as to Sunday newspapers.

"How to Make Sunday School Work More Attractively," by J. F. Drake, was laughing and hearty followed by discussion of great interest.

"How to Reach the Indifferent," by W. L. DeGroot. This discourse yielded thoughtful very practical outlined (1) discover the individual; (2) a desire to reach him; (3) stimulate a missionary spirit. Methods: First, personal contact in round about ways; second, by persistence. This topic called out many good thoughts and suggestions.

The committee on resolutions was then appointed, as follows: Rev. George Smith, Mrs. Dr. Bass, J. M. Johnson. Adjourned to meet in the First Christian church at 7:30 p. m.

Evening Session. Song service led by Mr. Caldwell; prayer by Dr. W. H. Bass. Address of welcome by Mr. P. Rohrbach.

Committee on nonattendance—Mr. W. L. DeGroot, Mr. Williams, Mr. C. S. Caldwell, Mr. Rohrbach, Mr. Schollenger.

Then the committee listened to a lecture by J. F. Drake on the subject "The Old and the New." The first part of the lecture took the audience back to the days of the Patriarch when oral instructions were handed down from parent to child. The lecturer said it is easier to do work now than in olden times. Less than fifty years ago a Sunday school worker was called a fanatic. The first movement to supply this country with the Bible in 1700. And today the Bible is crowded from the

NEW CHANGES MADE

THIRTY MIL'S OF THE WICHITA AND WESTERN TO BE IDLE

Operations Abandoned Between Cullison and Mullinville—Receipts were Only About Ten Per Cent of the Expenditures and Retrenchment Became Necessary—The Saving Made will be Appropriated Partly to Better Service Over the Remainder of the Road—New Passenger Train Put on for Daily Runs.

Receiver McIntire of the Wichita and Western road has made an important change in that branch which will take effect in a few days. The new time card is now in the hands of the printer and it is about ready.

By the change operations on thirty miles of the road will be abandoned temporarily, that is to say, from Cullison to Mullinville.

He has also made a change in the train service that, doubtless, will be much appreciated. From now on there will be a passenger train on the road from Wichita to Cullison. It will leave Wichita at 5:30 in the afternoon and reach Cullison about 9 o'clock at night, not only enabling the western patrons of the road to pass from one point of the line to another in a few hours, but giving them all the comforts of first class accommodations. Hereafter passengers from Wichita to Cullison, and vice versa, not only had to ride behind a freight train, but were subjected to wearisome delays. The new train will start but never know definitely when they would arrive at their destination. Under the new plan, or change, passengers can leave Cullison in the morning at 6 o'clock and can reach Wichita at 10 a. m. They will have adequate time here to transact their business before 5 o'clock in the afternoon and can return to their homes early in the night.

The freight train will run the road every day. It will leave here one day, arrive at Cullison that night and return the next day. Freight can be shipped from Wichita every other day and the service promised to first class passengers is being given.

The object in cutting off operations on the west end of the road is to save expenses. During the last year the receipts of the road were \$2,500,000. In this time this would be a mere bagatelle, but the service possible with the company is compelled to retrench in every way possible.

Mr. McIntire has been anxious for a long time to give the patrons of the road a better service, but with the losses suffered by the operation of the non-paying part of the road he could not see his way clear to do it. The fact is that what he takes away from the non-paying part of the road he proposes to give to the paying part in the way of better accommodations. He takes a great deal of interest in the road and has always been very seriously anxious to give the people the best service possible without voluntarily increasing the losses.

When asked last night about the matter he spoke hopefully of the future and expressed it as his belief personally that the company would be able to give between Cullison and Mullinville will be only temporary—that is, that it will not last very long. He says that the people will not suffer any inconvenience as the Rock Island road parallels that part of his road west of Cullison and that both the passenger and freight traffic will be really as good, so far as the communities are concerned, as if the Wichita and Western had been in operation.

People interested in traffic along the line believe the change to be a very good one and not a fact of being approved of it personally to Mr. McIntire who, they know, is doing earnest work both for the road and its patrons; and those who know anything about the operation of a railroad during hard times know that it requires no little brain work to manage the Wichita and Western road.

Two trains taken off. No more Sunday morning Rock Island trains to run. Commencing tomorrow morning no more Sunday morning trains on the Rock Island will run south nor the mid-night train north. Nos. 3 and 4 have been discontinued on Sunday and people who are in the habit of traveling should note well this fact. Nos. 13 and 29 on the Harrington and Liberal branch have been discontinued also.

The taking off of these trains will be bad news for the Oklahoma towns along the line of the Rock Island as all Sunday train running through the Territory then will be in the night and darkness.

LOTS OF BAD BURGLARS. They are Running All Over Kansas and Doing Evil Work.

City Marshal Clark of Cottonwood Falls was in the city last night in pursuit of some vagabonds who broke into his store in his town and robbed it of about \$200 worth of goods, principally light and valuable articles of clothing and goods of various kinds. The chief of police brought out a bundle of fine neckties for Mr. Clark to examine, who were not any of those stolen from the Cottonwood Falls store. The neckties in possession of the police are fine, four-inch, red four-band and were found on the railroad track in the south part of town.

There is a general complaint about robberies in this part of Kansas now. Some hold burglaries are committed almost every night and there is no discrimination exercised by the thieves. They break into stores, postoffices and smoke houses and take whatever they are best able to pack away and dispose of. While Wichita is comparatively free from these depredations this is supposed to be the headquarters for the thieves and every mail brings to the police station letters and telegrams announcing a robbery in some neighborhood.

READY TO MOVE TO TOWN. Judge Dale in the City Yesterday Making Arrangements to Move In.

Judge-elect David M. Dale was in the city yesterday making arrangements preparatory to moving to the city. He thought about getting a suit of rooms in the Sedgewick block, but he afterwards changed his mind and took rooms at the residence of Mr. Kramer until his own home was ready for him on March 12, at which time he will move into it. Until then he and Mrs. Dale will board with Mrs. Lewis.

Mr. Dale reports the sale of his cattle, hogs and some farming utensils as being very good. He sold one hog for over \$60 and cattle proportionately high. He had an immense sale so far as attendance was concerned and the incidental free lunch was no small affair.

DEATH OF HIGH SCHOOL GRADUATE. Berdin Sisson Passed Away Wednesday at Fort Worth.

Mr. Burdell R. Sisson died at Fort Worth, Tex., on Wednesday, Dec. 4, at 10:35 a. m.

Mr. Sisson was a graduate of our city high school, class of 1922. Soon thereafter he was employed in Chicago where he was engaged as book-keeper for a large lumber firm on the West Side. During the month of August he was attacked with diphtheria and died of the disease, which caused his early death.

In the month of September he was married to Miss Lola Hinman, an accomplished lady of Chicago. Six weeks after his marriage his brother Perry accompanied him to Texas, hoping that climatic influence would restore him to health again. His wife arrived at Fort Worth one hour and thirty minutes before his death. He was conscious almost to the last and passed away very peacefully. His many friends here will receive this news with sorrow.

Attorney General Galbraith of Oklahoma spent yesterday in the city en route to Kansas City, where he goes on business. Mr. Galbraith speaks encouragingly of the condition of affairs in the territory and compared with other places it is enjoying prosperity.

A. D. Spencer was thrown from his horse yesterday near the packing house and severely injured about the head. Dr. Hupp was called, he said the man in an unconscious condition in which state Mr. Spencer remained for an hour and a half. The doctors pronounced the injuries severe but thinks the man will recover. He received a severe gash on the nose.

A MUSICAL MOUSE. He Chose to Make His Home in the Piano. A nice little animal story is given in Nature Notes, which raises the interesting question whether mice have a fondness for music. It is contributed by a musician, who says: "One evening I was somewhat startled at hearing my piano suddenly giving forth sweet sounds, apparently of its own accord. A mouse, so it proved, had got inside the instrument, and was making music on the wires. Whether this was intentional on mouse's part or not, I cannot say; perhaps he was trying to make a nest for himself there. Some years ago, however, while a piano was being played in the dining-room of my old home, several mice came out upon the hearthrug and began to jump about, apparently with delight at the sound of the music, and one allowed himself to be carried away in a tongs by the housemaid." After this, ladies ought to lose their antipathy to mice; indeed, we may soon expect some humanitarian dame to commence musical parties for their delectation. It would be amusing to see them dance, and form a really humane method of catching them.

DIVIDE THE STATE

PLAN PROPOSED FOR TWO UNITED STATES COURT DISTRICTS.

Meeting of Prominent Southern Kansas Lawyers to be Held Here Soon to Formulate a Plan for the Proposed Division—Wichita will be Headquarters—Chester I. Long will Present the Bill in Congress—Creating the New District—If the Act is Passed it will Create Several Good Offices to Fill.

There will be a meeting held in this city either tonight or Monday night for the purpose of formulating a plan of some kind towards getting a separate United States court district with headquarters in Wichita.

The meeting will be attended by some prominent lawyers who are interested personally and professionally in the movement.

The plan is to divide the state into two federal court districts with headquarters for one in Topeka and headquarters for the other in Wichita. In the southern district there are to be two divisions, one called the Ft. Scott division and one the Wichita division.

A few days ago Colonel Joe Richards of Ft. Scott was in the city and it is said that he was here for that purpose. At any rate the matter has been talked a great deal here, among the lawyers since Mr. Richards' visit.

It is said that United States District Attorney Perry is very friendly to the proposition, that Judge Foster likes it and that United States Marshal Neely is not kicking very much, even though it will effect his income.

When the matter is agreed upon thoroughly among the lawyers it is said that Chester I. Long will be very willing to introduce a bill in congress creating the new district in accordance to whatever plans may be adopted.

If the plan is created there will be some pretty fat offices at the disposal of the president, and whoever he may appoint as judge. There will be a judge, district attorney, marshal, clerk and a half dozen, paying deputy clerks.

In conversation last night a well known lawyer said: "I am inclined to think that the proposition will be successful. The present district of Kansas is entirely too large and its business too much for one judge to handle with anything like promptness. Cases are way behind now and the only relief feasible is to have a new district with a complete set of officers."

"From what I know of the work that is being done I am inclined to think that we will get a new district embracing the southern half of the state and that our headquarters will be in Wichita where the government building is with plenty of accommodations for a court and its officers."
